SECUMAX 350

NO. 350001

Original size

2in1 blade head

Double function and double use: Both the blade and the device to scratch off adhesive tape have a double use. It's worth it for you. You can simply remove the blade head and turn it around or change it.

Concealed blade

The SECUMAX 350 is provided without a sharp blade tip. Instead, its blade head is so narrow and the two cutting edges so large, that you can open double layered cardboard boxes and much more safely with it.

Spare blade in the handle

You can change the blade easily and safely, by opening the handle manually at the top. You then reach the "magazine" with the spare blade. And you release the locking mechanism of the 2 in 1 blade head at the same time.

Light and easy

A cutting heavyweight, but at only 37 g it doesn't weigh much. So even high cutting frequencies won't weigh heavily on you. You will even "feel light" when handling the blade: Since it is moulded in, there is no risk to your fingers.

Ergonomically shaped

Right handed or left handed? It's actually all the same. Because the SECUMAX 350 adapts to any hand. The "carrying comfort" is supported by the arching of the outer edges, the pleasant soft grip and the grooves on the handle.

More fun while you work? Try it out.

With the new SECUMAX 350, versatility, comfort and the highest degree of safety go hand in hand. The SECUMAX 350 is really multi-talented - and even promises an innovative blade change. You can cut all commonly used materials, from film to plastic hoops and double layered cardboard boxes. It tears open adhesive tape really easily too. And what's more, it feels so good that you'll hate to put it away again.

PRODUCT FEATURES

Installed blade

Usage

Safety technology

Concealed blade - the highest degree of safety

The SECUMAX 350 blade is not an open one, but is hidden from people and goods. This provides you with the highest degree of safety from cut injuries and from damage to goods.
