

Affordable Network Capacity

NETGEAR presents a great way to increase your network's capability without breaking your budget: the 16-port JFS516. This 10/100 Mbps Fast Ethernet switch provides expanded connectivity for small office networks so users no longer have to compete with each other for bandwidth.

All of the essential features – automatic speed and full/half duplex sensing, 200 Mbps throughput per port, Auto Uplink™ – are included, but at an economical price that a value-conscious business owner can't ignore.

**Thrifty**

The ideal, low-cost solution you've been looking for, the unmanaged JFS516 lets you ramp up your office network to a new power level – affordably.

**Capable**

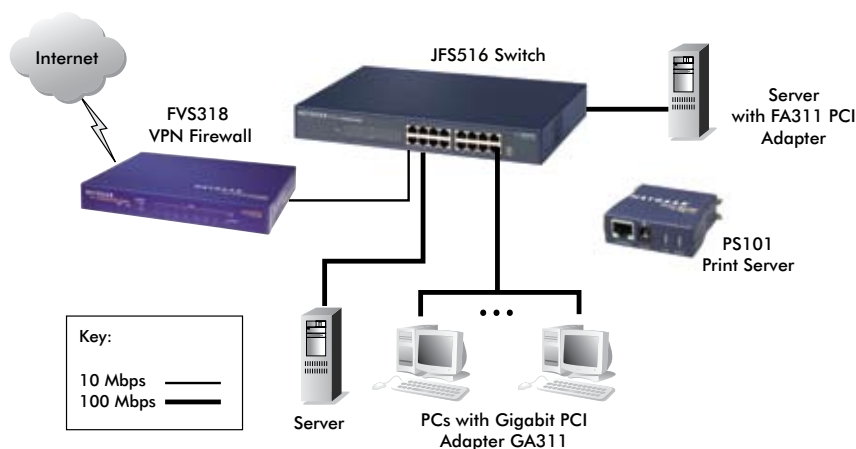

Sixteen switched ports provide private bandwidth for PCs, servers, or hubs, and support 200 Mbps of throughput. Each port delivers 200 Mbps of network speed in full-duplex mode.

**Perceptive**

As soon as it's powered on, it begins operating. Every port automatically senses the proper speed and full/half duplex mode, and Auto Uplink adjusts for straight-through or crossover cables to make the right link.

**Practical**

This high-performance switch makes it easy to combine 10 and 100 Mbps devices within your network. As an added convenience, these sturdy metal units can be mounted in a standard 19-inch rack.
